23 January 1957

MEMORANDUM FOR: Project Contracting Officer

25X1 ATTENTION :

[REDACTED]

THROUGH :

Deputy Project Director

SUBJECT :

Follow-up on Trip to Air Reconnaissance Laboratory

25X1 REFERENCE :

Memorandum to Project Director from [REDACTED]
[REDACTED] dated 14 January 1957 (SAPC-12137)

25X1

1. I read the reference with interest and note the action that is being taken. The one recommendation therein contained which seems to require further action is that stated at the top of Page 3. It is that this Project and the FOG between them could provide data on experience with thin base film and thus save the ARL quite a lot of time and trouble.

25X1 2. I fully concur with this recommendation. I would suggest that [REDACTED] assume responsibility, in consultation with the Project Security Officer, for developing a way in which the benefits of our experience could be made available to ARL without imparting knowledge of AQUATONE. I should think the way to do this would be to develop a suitable cover story in which representatives of Eastman could provide the relevant data. Alternatively, the data might be provided through SAC, again with a cover story to explain how the experience with thin base film was obtained.

RICHARD M. BISSELL, JR.
Project Director
